

Hemorrhoids/Hemroids Relief-Three Common Mistakes You Must Avoid

Hemorrhoids are basically swollen anoctal veins that are engorged with extreme pooling of blood. It has an effect on about 50% of adults at some time in their lives. It really is also known as piles, hemroids or hemoroids. (Click here in order to obtain a free book on hemorrhoids)

Hemorrhoids commonly present with the following symptoms:

Rectal bleeding as evidenced by the presence of blood in the tissue paper or the streaking of stool with blood.

Itching in Your Lower Rectal Region

Pain during defecation, worsened by constipation.

These common symptoms cause a lot of pain and embarrassment towards the hemorrhoid victim and in the more severe stages of hemorrhoids a lump can be felt protruding out of the anal sphincter. Learn more about how best to relieve discomfort symptoms of hemorrhoids.

To obtain relief from the pain and other upsetting symptoms of Hemorrhoid avoid these common mistakes made by Hemorrhoid sufferers.

HemorrhoidsHemorrhoidHemorrhoidalHemroids

Mistake 1:

Avoid consumption of a large amount of processed meals. For a good number of people this can be quite a challenge. Most of the fast food as well as foods that people purchase at the local grocery store are processed foods. Processed foods make stools hard and predispose to the development of constipation. You just have to realize that the pain these kind of foods give you far outstrips the the pleasure you get at from them. Try removing fast food and also limiting any of the processed foods. Most processed foods also have low nutritional value. Click here to learn more about 5 vegetables and fruits that will help you to prevent constipation.

Mistake 2:

Avoid living a sedentary life, do not spend a lot of time sitting down. Sitting creates pressure on the rectum. This provides the perfect environment for hemorrhoids to flare up. In particular when combined with the pressure that constipation or having a baby (for women) brings. When you have to sit for more than an hour you should get up occasionally and walk around to get the blood in your butt flowing again. Carry out some exercises to promote healthy blood circulation, and walk close to, To know other exercises that you can do to avoid hemorrhoids click on the links in the last paragraph below.

Mistake 3:

Avoid the use of medications and processed creams. Many of these creams and medications actually cause further irritation of the hemorrhoidal veins. The use of artificial fiber supplements should also be discouraged because they have side effects and they might end up worsening the symptoms of constipation. Even when these creams give relief such relief is generally short lived and also the symptoms always come back. Because these creams do not get to the root cause they are not going to do a lot to lighten the long term hemorrhoid pain relief and they effectively waste your time. (Click the links in the last paragraph beneath to know how to permanently relief your self in the symptoms of hemorrhoids)

Avoiding these 3 mistakes will not only help provide hemorrhoid pain relief but it will also improve ones overall health.
